DETAILED ACTION

1. This action is in response to the amendment filed 09/16/2004. Claims 1, 7, 33 and 38 have been amended. The specification has also been amended.

Allowable Subject Matter

2. Claims 1-3, 5-19, 33 and 35-43 are allowed.
3. The following is an examiner's statement of reasons for allowance. The present invention is directed to a method and system for administration of smart cards using local administrators. More specifically, independent claims 1, 33, and 38 identify the uniquely distinct features: "enabling the local administrator to operate as a proxy administrator by transferring, to the local administrator, rights and authorizations to administrate said at least one smart card" and "transmitting at least authorization information from the remote administrator to the local administrator to enable said local administrator to independently perform administrative operations". The closest prior art, DiGiorgio, discloses a method for administration of smart cards without using local administrator. Another prior art, Aboba, discloses local ISPs as local administrators for roaming users. The prior arts, taken either singly or in combination, fail to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.
